## Asset Information + Better Vulnerability Data = Better Security

At Risk Based Security, we have always believed that one of the critical components of effective security is knowing your vendors and assets, understanding the threats and vulnerabilities that may impact those vendors and assets, and then using that data to prioritize mitigation actions.

With the VulnDB® integration into the Device42 platform\*, you can easily map the best-in-class vulnerability information from VulnDB to the asset data discovered by Device42 and view a near real-time list of vulnerable software in your environment. In addition, you can use the rich metadata from VulnDB to understand the most critical vulnerabilities and assets that should receive attention first, yielding a truly risk-based approach.

	Name	Software Type	License Model	Vendor	Category	License Count	Discovered Count	VulnDB Product Rating	Vulnerability Count
<input type="checkbox"/>	7-Zip 16.02	Unmanaged	Individual - Device/Perpetual	Igor Pavlov	(None)	None	(None)	4.0	15
<input checked="" type="checkbox"/>	7-Zip 16.02 (x64)	Unmanaged	Individual - Device/Perpetual	Igor Pavlov	(None)	None	(None)	4.0	15
<input type="checkbox"/>	7-Zip 16.04 (x64)	Unmanaged	Individual - Device/Perpetual	Igor Pavlov	(None)	None	10	4.0	15
<input checked="" type="checkbox"/>	7-Zip 17.01 beta (x64)	Unmanaged	Individual - Device/Perpetual	Igor Pavlov	(None)	None	(None)	4.0	15
<input checked="" type="checkbox"/>	7-Zip 18.01 (x64)	Unmanaged	Individual - Device/Perpetual	Igor Pavlov	(None)	None	(None)	4.0	15

<input type="checkbox"/>	7-Zip 18.05 (x64 edition)	Unmanaged	Individual - Device/Perpetual	Igor Pavlov	(None)	None	(None)	4.0	15

### CHECK YOUR ENTIRE IT DEPLOYMENT AGAINST VULNDB, AUTOMATICALLY

Device42 is a comprehensive, centralized, and cost-effective CMDB solution that discovers and maps your entire IT infrastructure, automatically. Integrate VulnDB to:

- View a near real-time list of vulnerable software - and where it's running**  
 Use Device42 + VulnDB to see an up-to-date list of machines running software instances with disclosed vulnerabilities – on demand.
- Understand vulnerability details**  
 See software type, license model, vendor, category, license count, and more for each software component, and click the ID to see full vulnerability details.
- API access to vulnerabilities**  
 Search by software ID and quickly see all disclosed vulnerabilities.

Experience the power of Device42 + VulnDB today at [www.device42.com/integrations/vulndb/](http://www.device42.com/integrations/vulndb/)
