

Integrations and Connectors

VulnDB® is the most comprehensive and timely vulnerability intelligence available and provides actionable information about the latest in security vulnerabilities via an easy-to-use SaaS Portal, or a RESTful API that allows easy integration into other tools and ticketing systems.

VulnDB Features

Over 244,000 vulnerabilities tracked, representing 57,000 products & 27,000 Vendors

Your only source for Vulnerability Timeline and Exposure Metrics (VTEM)

Five-Star rating system ranks software products and publishers

Over 79,000 vulnerabilities NOT found in CVE/NVD

Continual updates by an expert research team

Partnerships

VulnDB data can also be found in **offerings from the following partners:**

RESTful API

In addition to the numerous integrations and partnerships listed above, a RESTful API option is available for VulnDB that allows integration into custom applications or workflows. RBS offers a variety of services to support our customers in their use of our RESTful API to meet such specialized integration requirements.
